EXPERIENCE

Senior Software Engineer, Monite

Berlin, Germany (Remote) | May 2024 - Present

- Building finance APIs for accounts receivable (AR), payments, and accounting automation serving neobanks, vertical SaaS platforms, and payment providers
- Implemented delivery notes API extending document workflows for legal proof-of-delivery compliance, supporting Construction/Vertical SaaS partners
- Rebuilt Recurring Invoices API v2 with improved automation and flexibility features
- Developed PDF customization engine for AR documents with dynamic templates, styling, and line item configurations for partners' diverse branding needs
- Integrated working capital partner APIs enabling invoice/bill-based business loans for clients
- Created internal MCP server providing access to engineering handbook and API guidelines for AI-assisted development
- Designed PRD-to-Dev AI environment connecting issue tracking, code repositories, and internal systems via MCP integrations, helping engineers convert product requirements into development tasks with business context

Chief Technology Officer, ioka group

Almaty, Kazakhstan | Nov 2020 - May 2024

- Designed and developed payment processing gateway for e-commerce and fintech, handling system architecture, deployment, and maintenance
- Built API integrations with banks and financial services, expanding payment acceptance capabilities and strengthening strategic partnerships
- Mentored team members through regular one-on-ones and performance reviews, improving team efficiency

Software Engineer, Kazdream Tech

Astana, Kazakhstan | May 2019 - Nov 2020

- Researched and analyzed open-source data using advanced OSINT techniques
 - Automated data collection from 20+ social networking sites, messaging platforms, and web/mobile applications
 - Implemented web crawlers collecting OSINT data and integrated them into B2B APIs and real-time systems
-

EDUCATION

Nazarbayev University

Master of Science in Data Science | 2020-2022

Astana, Kazakhstan

Thesis: Sequential Deep Learning Models for Human Skeleton-based Gait Recognition

Nazarbayev University

Bachelor of Science in Computer Science | 2016-2020

Astana, Kazakhstan

Related courses: Algorithms, Performance and Data Structures, Deep Learning, Graph Theory

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frameworks & Tools: FastAPI, aiohttp, Docker, RabbitMQ, PostgreSQL, Redis

Specializations: Fintech APIs, Payment Systems, AI/ML Integration, API Design
